Zié Daniogo

Full-stack and AI product engineer

Abidjan, Côte d'Ivoire WhatsApp +225 07 15 73 68 02 daniogoaboubakar@icloud.com github.com/daniogo225

I design, build and ship web, mobile and AI applications, from mockup to production.

I orchestrate specialized AI agents and review every delivery: the pace of a small team, one accountable person.

01
Experience

Comafrique Technologies

Abidjan, since January 2023

Technical lead of the development team

Joined as a full-stack developer.

Delivery
Web and mobile applications shipped end to end, from scoping to production.

Architecture
Multi-instance platform deployed for several entities of the same group.

Leadership
Team leadership: architecture, code reviews, technical choices.

AI
AI agents and voice assistants built into business applications.

Cloud
Servers deployed and run on Oracle Cloud and Forge: releases, monitoring.

Security
Application security audits and vulnerability fixes.

02
Skills

Interface
React, Next.js, Inertia, TypeScript, Tailwind

Back end
Laravel, PHP, Node, APIs, queues

AI
Tool-using agents, real-time voice, context engineering, Claude Code, Codex

Mobile
React Native, Expo

Quality
Pest, Vitest, Playwright

Cloud
Oracle Cloud, Forge, Docker, VPS, Git

03
Education

Pigier Côte d'Ivoire, Abidjan
Application development. Passed the BTS IDA admission (2022, two-year technical degree), first year of bachelor's completed.

Languages
French, fluent; English

Interests
Interface design, product, football.
